PROFILE

PhD-trained economist specialising in AI, productivity, labour markets and policy evaluation, working at the intersection of policy-making and applied economic research. Combines rigorous analysis with decision-relevant outputs, experience managing international projects, also involving the private sector, and frequent communication with policy-makers and academic audiences.

PROFESSIONAL EXPERIENCE

OECD (Organisation for Economic Co-operation and Development) — Paris, France

Sep 2022 – Present

Economist, Economics Department

AI & PRODUCTIVITY

Initiated and developed a research workstream on the macroeconomic impact of artificial intelligence, with a focus on productivity and economic growth.

- *The Impact of Artificial Intelligence on Productivity, Distribution and Growth* — OECD Artificial Intelligence Papers, 2024
- *Miracle or Myth? Assessing the Macroeconomic Productivity Gains from Artificial Intelligence* — OECD Artificial Intelligence Papers, 2024
- *Macroeconomic Productivity Gains from Artificial Intelligence in G7 Economies* — OECD Artificial Intelligence Papers, 2025
- *AI Meets Trade: Global Linkages and the Cross-Country Distribution of the Gains from AI* — OECD Artificial Intelligence Papers, 2026
- *Aggregate Productivity Gains from Artificial Intelligence: A Sectoral Perspective* — AEA Papers and Proceedings, 2026

LABOUR SHORTAGES & MISMATCH

Research featured in the 2024 special chapter of the *OECD Economic Outlook*.

- *How Do Structural Trends Affect Labour Market Shortages and Mismatch?* — OECD Productivity Working Papers, 2025
